

Turro Group Responsibility List – September 2010

The person responsible for a given piece of equipment should make sure that it is in working order, and that procedures are being followed. They must be thoroughly familiar with the instruments for which they are responsible, and know how to contact the company for advice. Other areas are simply a way to keep the lab clean, organized, and safe.

Equipment / Area	Main Person	Backup Person
HPLC	Scott	Bryan
